

Eastbound I-10 to close between US 60 and Loop 202 (Santan/South Mountain Freeway) July 22-25

Construction crews to shift work zones

PHOENIX – The Arizona Department of Transportation is advising motorists to plan ahead and prepare to use detours this weekend while traveling on Interstate 10 in the Southeast Valley.

Eastbound I-10 will be closed between US 60 and Loop 202 (Santan/South Mountain Freeway) from 10 p.m. Friday, July 22, to 4 a.m. Monday, July 25. During this closure, crews with the [I-10 Broadway Curve Improvement Project](#) will shift work zones into the median to prepare for the installation of digital message boards.

The following ramps will be closed:

- The eastbound I-10 on-ramps between Broadway and Ray Roads.
- The westbound US 60 ramp to eastbound I-10.
- The eastbound I-10 High Occupancy Vehicle (HOV) ramp to eastbound US 60.
- The westbound US 60 HOV ramp to westbound I-10.

Eastbound I-10 Detour: Use eastbound Loop 202 (Red Mountain Freeway) or eastbound US 60 to southbound Loop 101 (Price Freeway) to westbound Loop 202 (Santan Freeway) to access I-10 beyond the closure.

West Valley drivers who are heading to the Southeast Valley can bypass the closure by using the Loop 202 (South Mountain Freeway). From I-10 and 59th Ave., head south and then east on Loop 202 (South Mountain Freeway) to connect with eastbound I-10 just south of Chandler Boulevard.

This weekend's closure is another in a series of closures on the schedule this summer. Valley motorists should plan for [additional weekend closures](#) and other restrictions through fall.

Work on ADOT's largest urban freeway reconstruction project is progressing. View construction-progress photos [here](#).

###

The I-10 Broadway Curve Improvement Project is identified in the Maricopa Association of Governments' Regional Transportation Plan, funded by a half-cent sales tax approved by Maricopa County voters in 2004 through Proposition 400. MAG identified the need for this project to reduce travel times on I-10 during peak hours; improve airport access; support ridesharing and transit; and prepare the region for future growth projections. Learn more about the major improvements [here](#).
